

# Hoe on jou miniWET-Gesondheid hulpmiddel te gebruik

## STAP 1: IDENTIFISERING VAN GRONDBEDEKkingTIPES IN 'N VLEILAND

**(A)** Identifiseer watter landbedekkingtipe(s) wat in Tabel 1 gegee word, in jou vleiland gevind word. Skat hoeveel grond deur elke tipe in die vleiland bedek word. Dit is die "omvang". Merk dit vir elke kategorie in Tabel 1.

**(B)** Neem 'n foto van elk van die grondbedekkingtipes wat in jou vleiland geïdentifiseer was.

## STAP 2: IDENTIFISERING VAN GRONDBEDEKkingTIPES IN DIE OPVANGGEBIED

**(C)** Identifiseer die grondbedekkingtipes wat in jou vleilandopvanggebied voorkom. Skat hoeveel grond deur elke tipe in die opvanggebied gedek word. Dit is die "omvang". Merk dit vir elke kategorie in Tabel 2.

**(D)** Kies uit die prentverwysing en merk die omvang van die buffersone (natuurlike plantegroei) rondom die vleiland

## STAP 3: LET OP BYKOMENDE IMPAKTE

**(E)** Neem enige bykomende notas oor die grondbedekkings wat geïdentifiseer was.

## STAP 4: OPVOLGAKSIE

**(G)** Let op enige dringende aksies wat nodig is om geïdentifiseerde kwessies aan te spreek (bv. onwettige storting van vaste afval) en wie gekontak moet word.

**(H)** Let op enige ander sleutelbestuursaksies wat vereis word en relevante partye wat jy dink dalk gekontak moet word

1

**Table 1:** Impact intensities for a range of different land-cover types potentially occurring within a wetland

Land-cover/disturbance types	Intensity of impact <sup>1</sup>	Extent in the wetland			
		<5%	5-25%	26-50%	>50%
Annual crops, commercial	With artificial drainage <sup>2</sup> Without artificial drainage <sup>2</sup>	Large Large			
Annual crops, subsistence	With artificial drainage <sup>2</sup> Without artificial drainage <sup>2</sup>	Large Moderate			
Sugarcane	With artificial drainage <sup>2</sup> Without artificial drainage <sup>2</sup>	Serious Large			
Vineyards & Orchards	With artificial drainage <sup>2</sup> Without artificial drainage <sup>2</sup>	Large Large			
Plantations	With artificial drainage <sup>2</sup> Without artificial drainage <sup>2</sup>	Large Large			
Recently abandoned lands	With artificial drainage <sup>2</sup> Without artificial drainage <sup>2</sup>	Large Moderate			
Semi-natural areas, including old abandoned lands	With artificial drainage <sup>2</sup> Without artificial drainage <sup>2</sup>	Large Small			
Tree plantations		Serious			
Dense infestations of invasive alien plants	Trees Herbaceous invasive alien plants, e.g. American bramble.	Serious Large			
Erosion gullies	Erosion gully with negligible vegetation colonization Erosion gully colonized with vegetation	Serious Serious			
Filling and infrastructure, including roads and buildings		Critical			
Mines and quarries		Critical			
Sports fields or gardens		Large			
Recent sediment deposits		Large			

2

**Table 2:** Impact intensities for a range of different land-cover types potentially occurring in a wetland's catchment

Land-cover types in the wetland's catchment	Impact intensity <sup>1</sup>	Extent in the wetland's upslope catchment		
		<5%	5-25%	26-50%
Tree plantations	Large			
Orchards & vineyards	Large			
Annual crops	Large			
Sugarcane	Large			
Mines and quarries	Critical			
Built up areas, roads, railway lines and airfields	Serious			
Golf courses, sports fields & low density settlements	Moderate			
Semi-natural vegetation, including old lands	None			
Natural vegetation	None			
Eroded areas	Large			
Dams	Large
